2.5 FLOXL.NET 9

1 Introduction

1.1 Scope

This document covers all steps required to install the following KELTON® Software products.

1. FLOCALC®.net V1.5.x

1.2 Hardware specification

The minimum recommended specification for installing FM²P.net products is:

Processor:	CORE i3 (or higher)
Memory RAM:	4 GB
Hard Drive space:	50 GB

1.3 Software specification

The following operating systems are supported:

- Windows 7 Professional x86 (32-Bit) & x64 (64-Bit)
- Windows 8.1 x86 (32-Bit) & x64 (64-Bit)

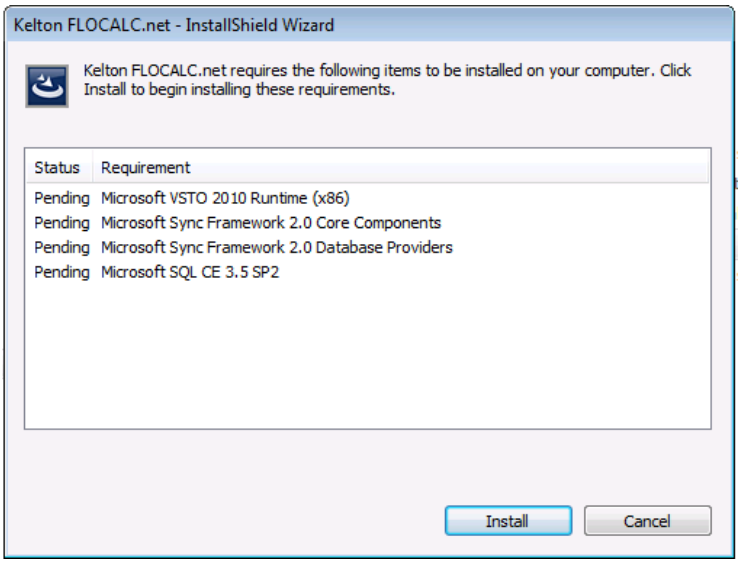
FLOXL.net is compatible with Excel 2010 and 2013 (32-bit) edition.[1]

[1] This can be installed on a 32-Bit or 64-Bit operating system

1.5 Prerequisites

All prerequisites required for installing the software are included on the installation disk and will be installed where required.

The list of pre-requisites for a new computer are shown below.



Kelton FLOCALC.net - InstallShield Wizard
Kelton FLOCALC.net requires the following items to be installed on your computer. Click Install to begin installing these requirements.
Status
Requirement
Pending Microsoft VSTO 2010 Runtime (x86)
Pending Microsoft Sync Framework 2.0 Core Components
Pending Microsoft Sync Framework 2.0 Database Providers
Pending Microsoft SQL CE 3.5 SP2
Install
Cancel

NOTE:

FLOCALC®.net includes direct integration with Microsoft Excel where the installation detects a compatible version of Microsoft Office as described in section 1.3 above.

If you require this functionality, please install Microsoft Excel *BEFORE* installing FLOCALC®.net.

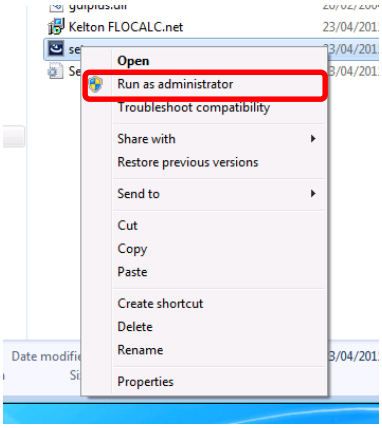
2 FLOCALC®.net Installation

2.1 Previous versions

If you already have a version of FLOCALC®.net which is lower than V1.4.0 this must be uninstalled prior to installing your new version. If you are upgrading from Version 1.4.0 or higher you can *update* when prompted by the installer.

2.2 Run setup

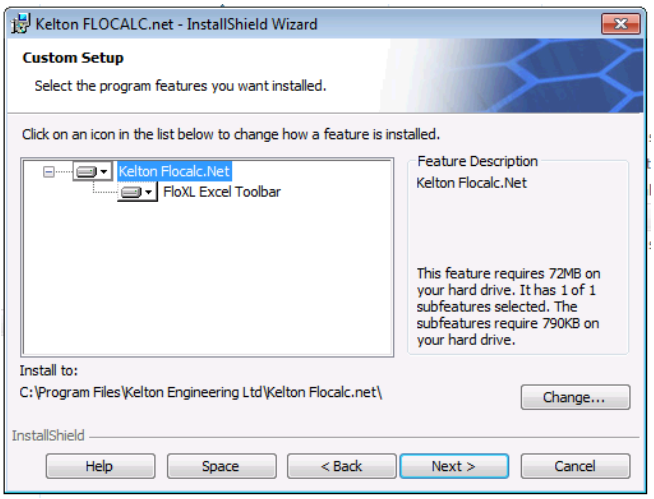
The file *setup.exe* should be run with *Elevated Privileges* by right-clicking and selecting the "*Run as Administrator*" option, as shown below.



2.3 Custom Setup

After accepting the licence agreement you will be given the options for customising the install. For example not installing the *FloXL Excel Toolbar*.

With this window you can select / de-select features to be installed with FLOCALC®.net. The defaults are recommended, as in this case.



Kelton FLOCALC.net - InstallShield Wizard
Custom Setup
Select the program features you want installed.
Click on an icon in the list below to change how a feature is installed.
Kelton Flocalc.Net
FloXL Excel Toolbar
Feature Description
Kelton Flocalc.Net
This feature requires 72MB on your hard drive. It has 1 of 1 subfeatures selected. The subfeatures require 790KB on your hard drive.
Install to:
C:\Program Files\Kelton Engineering Ltd\Kelton Flocalc.net\

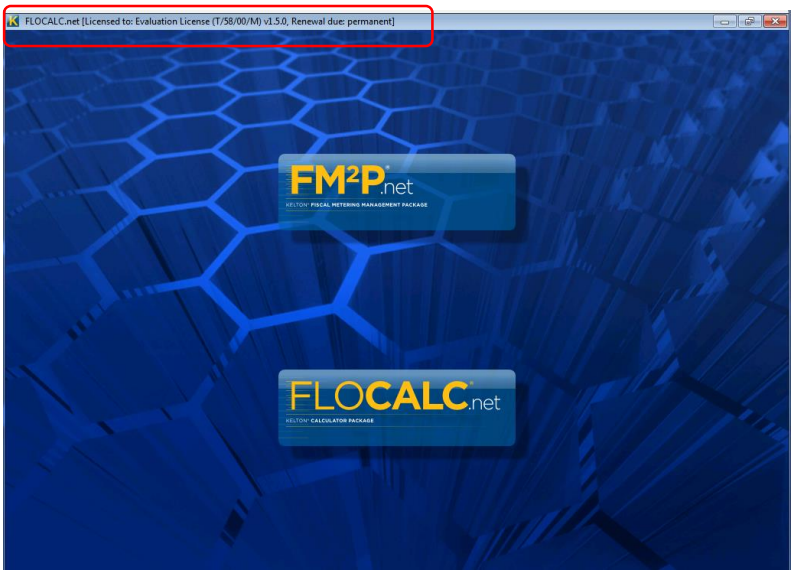
2.4 License Management

To enable installation and testing the application will be delivered with a licence containing limited functionality.

The Title Bar displays the Active License Information, as shown below.

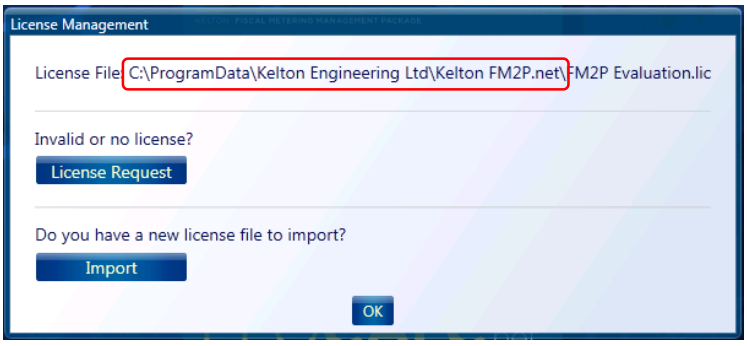


After installation, the licence file may be replaced with either:

- A temporary licence file which enables full functionality for a limited time period.
- A permanent licence file which is locked to the PC where the application is installed.

Both options require a *License Request File* which is used to configure the relevant License for issue.

To assist in this process, FLOCALC®.net contains a *License Management Utility* which is accessed under the FM2P.net icon (see above) when the application is loaded. This also displays the mandatory location of any License File.



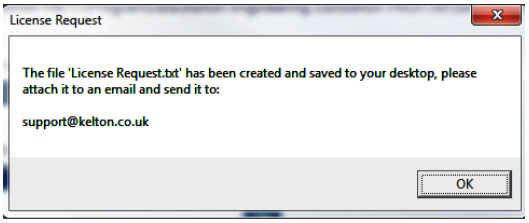
2.4.2 Licence Request

The default Evaluation License is installed automatically

Click the License Request button if:

- You have purchased a full license.
- The Title Bar displays *Invalid License*
- The Title Bar displays *No License*.

Details of your computer will then be written to text file (*License Request.txt*) which will be placed on the Desktop of your computer.



License Request
The file 'License Request.txt' has been created and saved to your desktop, please attach it to an email and send it to:
support@kelton.co.uk
OK

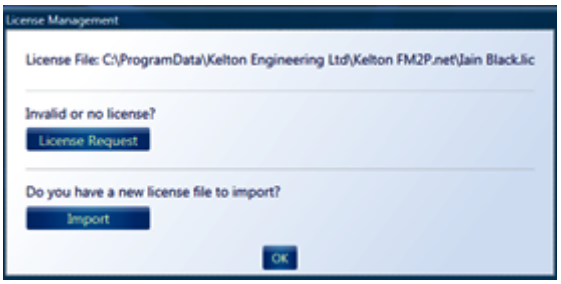
Send this file to support@kelton.co.uk along with the name of the licenced user and your Contract Serial Number (T/58/nnn).

Upon receipt of this information a license file will be created and issued to you by email including brief instructions for its use.

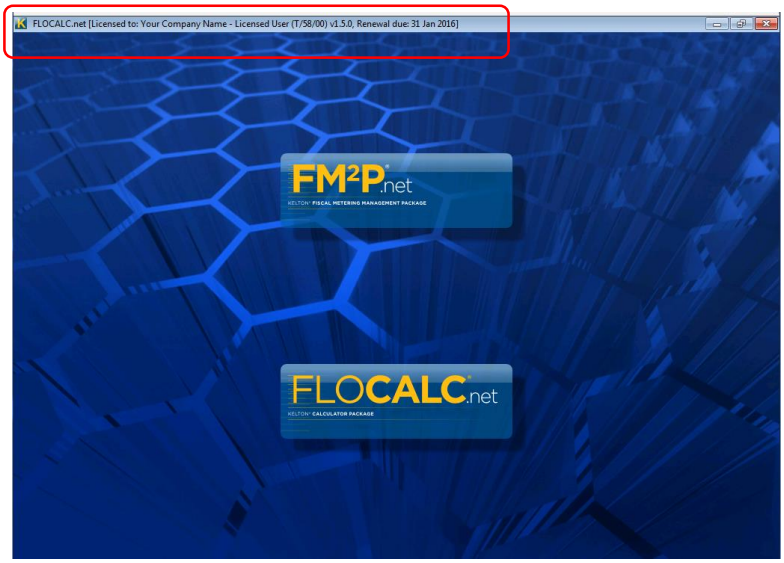
2.4.4 Import a new License.

Once you have received your licence file save it to any location on your PC or network.

Click the Import button to browse to the same location and select the licence file



Upon restarting, the Title Bar of FLOCALC®.net will display details of the imported license, as shown below.



Notes:

1. If due to your security settings this import process does not work, manually copy the licence file into:

   C:\ProgramData\Kelton Engineering Ltd\Kelton FM2P.net

2. Delete any *.lic files which are already in this location.

3. The *Import License* mechanism carries out steps 1 and 2 automatically.

2.5 FLOXL.net

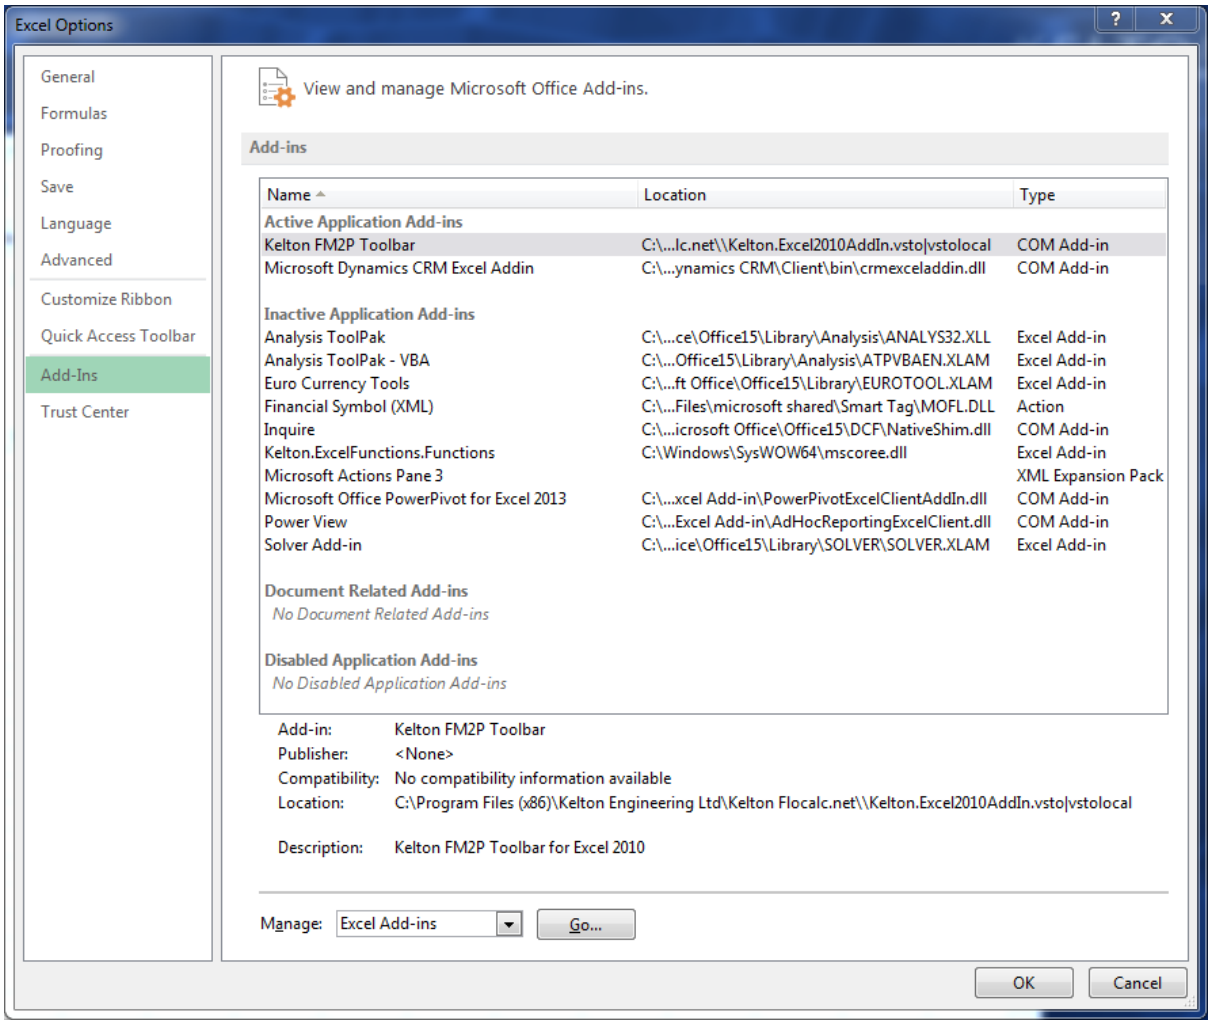
FLOXL.net enables direct integration with Microsoft Excel as described in section 1.3 above. This is installed automatically where a compatible version of Microsoft Office is detected during installation. If you require this feature, please install Microsoft Office BEFORE installing FLOCALC®.net.

Depending on how your computer has been configured you may have to switch on an Add-In the first time you run the application. If the add-In is not switched on you will see a #Name error when you use FLOXL.

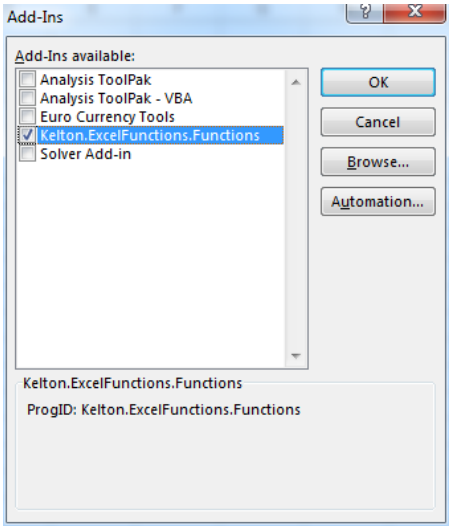
The procedure for this is:

1. Open Excel and click the File menu

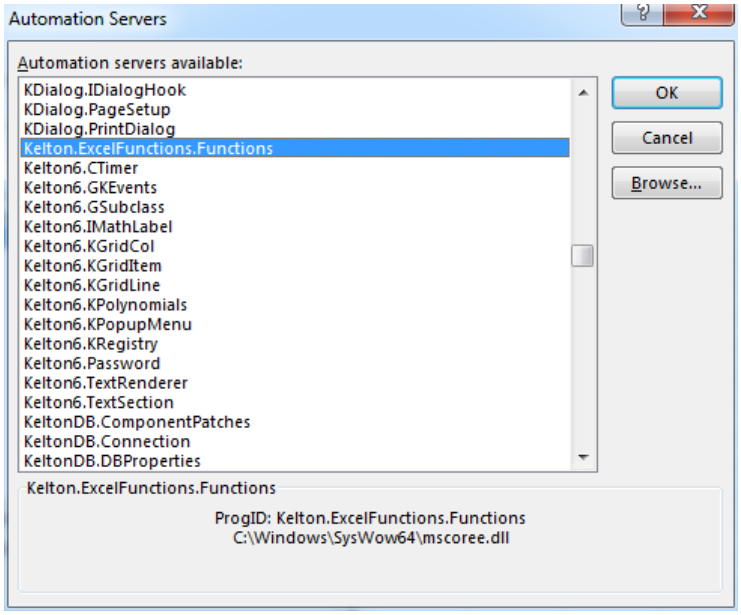
2. Select *Add-Ins* form the *options* section



3. Click on the Go… button at the bottom of the window to Manage Excel Add-Ins



4. If *Kelton.ExcelFunctions.Functions* is not included in the list click the *Automation* button.



5. Select *Kelton.ExcelFunctions.Functions* from the list of Automation servers and click OK
